

ONLINE ON CAMPUS

Master of Science in Insurance Management

With optional concentrations in:

Applied Business Analytics; Corporate Finance; Project, Program & Portfolio Management; and Supply Chain Management

Offered on campus, online, or in a blended format, the Master of Science in Insurance Management at Boston University's Metropolitan College (MET) is designed specifically for professionals who have earned the Chartered Property Casualty Underwriter (CPCU) designation. Those with the CPCU credential can achieve further distinction by complementing their demonstrated expertise in insurance issues with a mastery of forward-thinking management principles in accounting, finance, operations, and leadership. The CPCU designation serves as a waiver for two courses, enabling students to earn the degree by completing just 32 credits.

The MS in Insurance Management is ideal for professionals who hold positions such as underwriter, senior underwriter, underwriting manager, underwriting quality review auditor, product specialist, operations specialist, claims adjuster, claims specialist or manager, and account executive, as well as other members of the insurance ecosystem (such as insurance risk managers, consultants, business developers, relationship managers, management analysts, and insurance data analysts) who wish to gain a broad graduate-level education in management that complements their expertise. Students hone their ability to anticipate and solve challenges that span the legal, ethical, financial, and global aspects of the insurance business while developing valuable skills in business analytics, enterprise risk analytics and management, project management, decision-making, finance, and innovation. Graduates of the master's in Insurance Management program will be poised to put their leadership abilities to work in their organization

PROGRAM FEATURES

- Study with top-quality faculty with strong academic and industry experience in the field.
- On-campus and online courses offer a unique combination of dynamic academic curricula, leveraging the latest educational technologies, flexible delivery modes, and a dedicated teaching and support team.
- GMAT/GRE not required.
